

# Capacity development on climate resilience measures in cities

Proudly presented by  
KC 4C30 and Globe G430

## Potential Climate/ Disaster Impacts addressed and Justification for this Approach

Urban planners in Bangladesh (both on a national and local level) are facing a lack of practical knowledge on the importance of including climate resilience measures in urban planning processes. Therefore, capacity development measures are needed to generate a basic understanding of climate change and urban development.

## Process of Implementation

Based on stakeholder consultations and an assessment of the capacity needs, a Capacity Development Strategy was developed. As part of this strategy, first IEC (information, education, communication) materials were developed, also considering input from national and international sources and analysis. Then, training modules (including training manuals and handbooks) were prepared. These trainings were also piloted in two cities and over 40 training batches. For upscaling and the backdrop of digitalization, the materials and trainings were uploaded and disseminated on a Digital Exchange Learning Platform (DELP). This platform will be integrated into an existing partner system, using the existing and government owned platform “Muktopaath”.

## Project Title

Climate Resilient Inclusive Smart Cities (CRISC)

## Project Number

18.2066.1-001.00

## Results and Impacts

Training modules and IEC materials, which provide practical knowledge and intersectional understanding of urban planning related to climate resilience. All available on a digital learning platform and therefore available beyond the project duration. Through the capacity development, horizontal and vertical knowledge exchange between national and local officials / planners / decision makers is also strengthened.

### TYPE OF APPROACH

Capacity Development

### COUNTRY

Bangladesh

### LEVEL OF INTERVENTION

(inter-)national, city

### TYPE OF RISK MANAGEMENT

prevention, resistance, transformation

### MAIN HAZARDS ADDRESSED

all

### URBAN FUNCTION PROTECTED

all

### SPHERE OF INTERVENTION

socio-political sphere/ governance, economy, environment

### COOPERATION PARTNERS

2 local consulting companies (ICLEI and PPBL), city government, national government
