

Resource Book on Urban Planning and Building Code

Potential Climate/ Disaster Impacts addressed and Justification for this Approach

Municipalities have started developing policies and regulations regarding earthquake resistance based on the developed resource book of the federal government. With the adaptation of policies and regulations, the municipalities have enforced construction of earthquake resistant buildings.

Process of Implementation

Based on Resource Book, municipalities have developed and enforced the polices at local level for disaster resistant buildings.

Project Title

Capacity Development to New Municipalities (CD-Mun)

Project Number

14.2515.6-001.00

Results and Impacts

People are aware of importance of earthquake resistance construcion; People have followed building code for their building construction.

Proudly presented by
KC 4C30 and Globe G430

TYPE OF APPROACH

Implementation of technical solution

COUNTRY

Nepal

LEVEL OF INTERVENTION

(inter-)national, city

TYPE OF RISK MANAGEMENT

prevention, resistance, transformation

MAIN HAZARDS ADDRESSED

earthquake

URBAN FUNCTION PROTECTED

Housing, public administration

SPHERE OF INTERVENTION

socio-political sphere/ governance, environment

RESOURCES REQUIRED

1 national staff (3 months) and 3 subject experts (2 months each)

COOPERATION PARTNERS

Ministry of Federal Affairs and General Administration and Local Governments
