

Disaster Preparedness

Potential Climate/ Disaster Impacts addressed and Justification for this Approach

Local Governments allocate negligible amount of budget for disaster preparedness and response. As a result, Local Governments are hard hit whenever there is a disaster. In order to overcome this situation, the idea of a Local Emergency Operation Center (LEOC) emerged. These LEOC have connection with the National Emergency Operation Center (NEOC). LEOC receive support from NEOC whenever there is need.

Process of Implementation

The ideas of establishing LEOCs and preparing LDCRPs were shared with Local Governments. National frameworks were developed that guide the development of LEOC and LDCRP. Experts supported the establishment of LEOC and the preparation of LDCRP following the standard national framework.

Project Title

Capacity Development Support to Governance (CDSG)

Project Number

18.2063.8-001.00

Results and Impacts

Local Emergency Operation Centers (LEOC) were established in Local Governments for disaster response and Local Disaster and Climate Resilience Plan was developed which is basis for local planning and resource allocation for disaster preparedness and response. The sequential steps for LEOC establishment and procedure for LDCRP was developed.

Proudly presented by

TYPE OF APPROACH

Access to finance

COUNTRY

Nepal

LEVEL OF INTERVENTION

subnational/regional, city, neighbourhood

TYPE OF RISK MANAGEMENT

prevention, resistance, transformation

MAIN HAZARDS ADDRESSED

landslide, earthquake, storm

URBAN FUNCTION PROTECTED

all

SPHERE OF INTERVENTION

socio-political sphere/ governance, economy, environment

RESOURCES REQUIRED

Equipment; 10000 EUR for one LEOC and 7000 EUR for the preparation of one LDCRP

COOPERATION PARTNERS

Ministry of Federal Affairs and General Administration /Local Governments
