

Guidelines for façade greening

Potential Climate/ Disaster Impacts addressed and Justification for this Approach

The project aims to reduce heat stress in Dong Hoi through natural cooling of buildings. This shall increase people's well-being and contribute to decrease energy consumption.

Process of Implementation

Project upscaling by developing a guideline and a case study from the Public Service Management Unit building in Dong Hoi city to share knowledge, experiences and lessons learnt

Project Title

Support to Viet Nam for the Implementation of the Paris Agreement

Project Number

2017.9010.4

Results and Impacts

TYPE OF APPROACH

Planning approach & decision support tools

COUNTRY

Vietnam

LEVEL OF INTERVENTION

(inter-)national, subnational/regional

TYPE OF RISK MANAGEMENT

prevention

MAIN HAZARDS ADDRESSED

flood, heat wave

URBAN FUNCTION PROTECTED

Public security/ civil protection, housing

SPHERE OF INTERVENTION

socio-political sphere/ governance, environment

COOPERATION PARTNERS

Hamburg University
