

Urban Laboratory Latacunga

Potential Climate/ Disaster Impacts addressed and Justification for this Approach

Urban resilience, risk management and adaptation to climate change

Project Title

CIS II

Project Number

2020.2169.9

Process of Implementation

The project seeks to provide technical assistance to the Municipality of Latacunga to increase capacities among local government staff and authorities, increase the collaboration between the Municipality and other stakeholders, and the implementation of the model of the risk management public policy. At the moment, specific instruments, including a strategic plan for risk management have been formulated and are being implemented.

Results and Impacts

Eleven guidelines were prepared that contribute to the implementation of the Ordinance that regulates the Decentralized Cantonal Risk Management System.

Formulation of the Latacunga Canton Risk Management Strategic Plan 2022-2030.

Generation of inputs for GAD's communication in emergency situations due to disasters.

Emergency plan for the eruptive process of the Cotopaxi volcano.
